Project Title: Affordance Norms for Object Nouns

Principle Investigator: Nicholas P. Maxwell

Department: Psychology

Email: nicholas.maxwell@msutexas.edu

Research Description

1. Purpose:

This study is designed to examine how individuals perceive and understand objects through word recognition and perception.

2. Description of Study:

Participants will be presented with a series of object names and will be asked to generate as many possible actions for each object as they can list.

3. Benefits:

Participants are not expected to directly benefit from participation. However, participants will receive 30 minutes of research credit that can be used towards an applicable course (e.g., PSCY 1103, PSCY 2203, etc.). Additionally, participants will receive exposure to research methods in cognitive psychology.

4. Risks:

The researchers do not identify any risks beyond slight boredom due to the repetitive nature of the task. However, if participants find that they are distressed, they may discontinue their participation at any time by closing their browser window.

5. Confidentiality:

Other than the consent form, participants will not place their name on any form or document associated with this experiment. Participants will be assigned a random identification number. Any data linking participant responses to their identification number will be destroyed immediately following conclusion of this study. All findings will be aggregated across participants, such that individual responses will not be linked to individual participants.

6. Alternative Procedures:

You are free to discontinue your participation at any time. Students completing this study in exchange for course credit may instead opt to complete alternate assignments. Please check with your instructor for details, as the nature of these assignments may vary between instructors/courses.

7. Participant's Assurance:

This project and consent form have been reviewed by the Human Subjects Review Committee at Midwestern State University. Any concerns regarding your participation in this study can be made in writing to the Office of the Provost (Hardin Administration Building; 3410 Taft Blvd., Wichita Falls, TX, 76803) or by phone (940-397-4226). Any questions regarding this study can be directed to towards Nicholas P. Maxwell (nicholas.maxwell@msutexas.edu).

Consent to Participate in Research

I understand that participation in this project is completely voluntary, and I may withdraw at any time without penalty. Unless described above, all personal information will be strictly confidential, including my name and other identifying information. All procedures will be followed as their purposes were explained to me. I received information regarding any anticipated inconveniences, risks and/or benefits regarding my participation in this study. Any new information that develops during this project will be provided to me if that information may affect my willingness to continue my participation in this study.

By signing below, I give my consent to participate in this research project.
